Novartis Foundation Symposium on Percept, decision, action: bridging the gaps, held at the Abdus Salam International Centre for Theoretical Physics, Trieste, Italy, in collaboration with the International School for Advanced Studies, 1–3 October 2004

Editors: Derek J. Chadwick and Mathew Diamond (Organizers), and Jamie Goode

This symposium is based on a proposal made by Mathew Diamond

Ranulfo Romo  Chair’s introduction  1

Dori Derdikman, Marcin Szwed, Knarik Bagdasarian, Per Magne Knutsen, Maciej Pietr, Chunxiu Yu, Amos Arieli and Ehud Ahissar
Active construction of percepts about object location  4
Discussion  14

Mathew E. Diamond, Erik Zorzin and Ehsan Arabzadeh  Neuronal encoding of natural stimuli: the rat tactile system  18
Discussion  31

Michael Brecht  Cortical commands in active touch  38
Discussion  48

General discussion I  51

Shabtai Barash and Mingsha Zhang  Switching of sensorimotor transformations: antisaccades and parietal cortex  59
Discussion  71

David L. Sparks and Xintian Hu  Saccade initiation and the reliability of motor signals involved in the generation of saccadic eye movements  75
Discussion  88
Joshua I. Gold  Multiple roles of experience in decoding the neural representation of sensory stimuli  92
Discussion  101

General discussion II  108

Jochen Ditterich  Computational approaches to visual decision making  114
Discussion  126

Giacomo Rizzolatti, Pier Francesco Ferrari, Stefano Rozzi and Leonardo Fogassi  The inferior parietal lobule: where action becomes perception  129
Discussion  140

Sarah J. Karlen and Leah Krubitzer  The evolution of the neocortex in mammals: intrinsic and extrinsic contributions to the cortical phenotype  146
Discussion  159

General discussion III  164

Ranulfo Romo, Adrián Hernández, Antonio Zainos, Luis Lemus, Victor de Lafuente, Rogelio Luna and Verónica Nacher  Decoding the temporal evolution of a simple perceptual act  170
Discussion  186

Konrad P. Körding and Daniel M. Wolpert  Probabilistic mechanisms in sensorimotor control  191
Discussion  198

Uri Hasson and Rafael Malach  Human brain activation during viewing of dynamic natural scenes  203
Discussion  212

Manabu Tanifuji, Kazushige Tsunoda and Yukako Yamane  Representation of object images by combinations of visual features in the macaque inferior temporal cortex  217
Discussion  226

General discussion IV  232

Justin A. Harris  Psychophysical investigations into cortical encoding of vibrotactile stimuli  238
Discussion  246
CONTENTS

Jacques Mehler, Marina Nespor, Mohinish Shukla and Marcela Peña

   Why is language unique to humans?  251
     Discussion  281

Final general discussion  285
